| Installation Type                          | Unit of Measure                            | Capacity/Flow rate<br>-1 | Make/model |
|--|--|--------------------------|------------|
| WC (single flush)                          | Flush Volume (litres)                      | eg 6                     |            |
| WC (dual flush)                            | Full flush Volume (litres)                 | eg 6                     |            |
|  | Part flush Volume (litres)                 | eg 4                     |            |
| WC (multiple fittings)                     | Average effective flushing Volume (litres) | eg 5.49                  |            |
| Taps (excluding kitchen/utility room taps) | Flow rate (litres/min)                     | eg 9                     |            |
| Bath (where shower also present)           | Capacity to overflow(litres)               | eg 158                   |            |
| Shower (where bath also present)           | Flow Rate(litres / minute)                 | eg 9                     |            |
| Bath Only                                  | Capacity to overflow(litres)               | eg 158                   |            |
| Shower Only                                | Flow rate (litres/minute)                  | eg 12                    |            |
| Kitchen/Utility room sink taps             | Flow rate (litres/minute)                  | eg 10                    |            |
| Washing Machine                            | (Litres/kg dry load)                       | eg 8.2                   |            |
| Dishwasher                                 | (Litres/place setting)                     | eg 1.25                  |            |
| Waste disposal unit                        | (Litres/use)                               |                          |            |
| Water Softener                             | (Litres/person/day)                        |                          |            |
